

PEOPLE FOR ANIMAL PATNA UNIT

(because every beingis alike human being)

What do you expect from an ordinary hospital? Ambulance ,x-ray machine, lifeline support,oxygen,medicines etc.what if you don't get these types of common facilities and you die because of minor infection rather than any severe disease ,imagine what would be the life of human being. it is difficult for us to imagine also ,than the facing of reality will be so difficult and beyond our imagination ,which we would never want t ever think about this.

But unfortunately this is the harsh truth and reality of the thousands of animals in patna.they are helpless to live like this ,”off course they are voiceless but definitely they are not lifeless”. they also have the complete right to live there life like we do or ant being on this earth have the right to avail this life. but this is also the harsh truth ,which is against the humanity, that some people does not care about these voiceless being. they do not treat in same way and have the mindset of being careless and rude toward animals.atleast once they should ask there conscience and face the reality about there behavior toward animals” who does not have voice but have the full right of life”.

People for animal Patna is taking one step forward to bring change in the society. They are taking different initiative toward animal development and changes in the mentality of the other beings who do not treat all being as there own being. over many years they are in this field promoting and educating peoples for change. they have done lots of things and treated thousands of animals in many years. they have also raised their voice again the ill treatment of animal. they do not only raised there voice but also done many campaign and carried out different types of programs in the development and for the welfare of the animals in the city.

They came forward in the protection of neel gaye movement across the city. they fought for their lives. they are also planning to launch ABC program for animals. it stand for animal birth control plan. under this plan they are planning to carry out different campaign and program in order to educate the people about the usefulness of animal and not to misuse the uses of these animals just for the shake of their own benefits and profit. now a days many peoples are misusing the animals birth for their own profit and the motive of business. for instance they misusing the birth of females cow for their benefits and their business growth rather than being caring about the welfare of animals. it is totally wrong and many organization including the pfa Patna are raising their voice all over the country.pfa organization is taking one step forward in order to protect the rights of the animals in the city.

They have carried out many plan and executed them successfully. but it is obvious that the support of masses is needed in every development program to make them successful.pfa Patna is also looking forward to receive help from the masses of Patna and country to help them in their mission and making their plan successful for animals in the city by contributing as much as any one can afford ,by donating or by coming forward in order to change the mentality of people because one new thinking and bring change in the thousand new mind. We have the power to change and motivate , if we can do so, than why not use this feature and qualities of human being for something good ,for those who really need our help. Come forward and provide your support to the organization because we really need it.
